7. **Daily Casual Engagement System** -Kim-Fay East Africa

Stacks (*Core PHP,Bootstrap,HTML5,CSS,Jquery*)

This is an application that automated manual and a lot of paper work previously done by Human Resource Representatives of Kim-Fay East Africa Ltd in efforts to engage casuals on a daily basis.It creates a flow of operations whereby each party involved is allowed to approve a placed application on hierarchy basis.Once all the stages are approved successfully the human resource representative prints contracts and approval sheets for signatures and payment purposes.

8. **Stationaries, Inventory Management System** -Kim-Fay East Africa

Stacks (*Core PHP, Bootstrap, HTML5, CSS,Jquery*)

Originally, employees used to manually request for stationaries, the inventory manager kept the tedious excel workbooks with stationaries inventory prone to errors because of non-automatic update. With development of this application, users can track status of their requested orders and the manager can keep automatic real-time inventory status.

9. **Results Analyzer**

Stacks (*Core PHP, Bootstrap, HTML5, CSS,Jquery*)

This is an application being used by three schools in Kenya to analyse students results,printing reports,broadsheets,providing analysis per stream,form,subject and termly report cards

10. **Performance Management System** -Kim-Fay East Africa

Stacks(*Laravel and Vue.js*)

This is A Human Resource Application that performs employee's individual performance evaluation, awarding them performance marks and ranking them. Human resource managers are able to get an analyzed annual performance index which helps them in performance appraisals and good report relevant for decision making.
